Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or pharmacist.
- This medicine has been prescribed for you only. Do not pass it on to others. It may harm them, even if their signs of illness are the same as yours.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.

**What is in this leaflet**

1. **What your medicine is and what it is used for**
2. **What you need to know before you take your medicine**
3. **How to take your medicine**
4. **Possible side effects**
5. **How to store your medicine**
6. **Contents of the pack and other information**

**What your medicine is and what it is used for**

Flucloxacillin is an antibiotic used to treat infections by killing the bacteria that can cause them. It belongs to a group of antibiotics called "penicillins".

Flucloxacillin is used to treat:
- chest infections
- throat or nose infections
- ear infections
- skin and soft tissue infections
- heart infections
- bone and joint infections
- meningitis
- digestive system infections
- blood infections
- kidney, bladder or urethra (the tube which carries urine from the bladder) infections.

Flucloxacillin can also be used to prevent infections during major surgery, particularly heart or orthopaedic surgery.

**What you need to know before you take your medicine**

Do not take this medicine if:
- You are allergic to any of the other ingredients of this medicine (listed in section 6).
- You have suffered previously from liver problems (e.g. jaundice) after taking flucloxacillin.

Warnings and precautions

Talk to your doctor or pharmacist before taking this medicine if:
- You suffer from kidney problems, as you may require a lower dose than normal.
- You suffer from liver problems, as this medicine could cause damage to the liver.
- You are 50 years of age or older
- You are taking other medicines, this includes medicines you have bought yourself as well as medicines on prescription from a doctor.

Your medicine contains sodium

This medicinal product contains approximately 52.3mg sodium per g. To be taken into consideration by patients on a controlled sodium diet.

**How to take your medicine**

Always take this medicine exactly as your doctor or pharmacist has told you. The directions may differ from the information contained in this leaflet. The pharmacist’s label should tell you how much to take and how often. Check with your doctor or pharmacist if you are not sure.

Take this medicine when your stomach is empty.

This means an hour before food or 2 hours after food. It is important that you take your medicine always at the same time. The dose will depend on the patient and will be decided by your doctor. However, the usual doses for each age group are:

- **Adults** (including the elderly): The usual dose is 250mg four times a day.
- **Children (2-10 years of age):** 125mg four times a day.
- **Children (10-18 years of age):** 250mg four times a day.
- **Children under 2 years of age:** 62.5mg four times a day.

**Use in children and adolescents**

Children (0-10 years of age): 1g daily divided doses at 6 hours apart.

Children under 2 years of age: 60mg daily divided doses at 6 hours apart.

Use in pregnancy and breast-feeding

If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask your doctor or pharmacist for advice before taking this medicine.

**Side effects**

You may have other serious illnesses (apart from the infection this medicine is treating) that may be made worse by flucloxacillin. You may be taking this medicine for a long time as regular tests of liver and kidney function are advised.

**Other medicines and Flucloxacillin**

Tell your doctor or pharmacist before taking this medicine if you are taking any other medicines, especially:
- Probenecid or sulphasalazine (used to treat gout)
- Methotrexate (a chemotherapy drug)
- Oral typhoid vaccine (antibiotics can make this less effective)
- Sulfamethoxazole (used with general anaesthetics)
- Piperacillin (an antibiotic taken by injection)
- Warfarin (medicine to prevent blood clotting)

Some medications may affect the way others work. Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines. This means medicines you have bought yourself as well as medicines on prescription from a doctor.

**Pregnancy and breast-feeding**

If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask your doctor or pharmacist for advice before taking this medicine.

**Other medicines and Flucloxacillin**

Tell your doctor or pharmacist before taking this medicine if you are taking any other medicines, especially:
- Probenecid or sulphasalazine (used to treat gout)
- Methotrexate (a chemotherapy drug)
- Oral typhoid vaccine (antibiotics can make this less effective)
- Sulfamethoxazole (used with general anaesthetics)

Some medications may affect the way others work. Tell your doctor or pharmacist if you are taking, have recently taken or might take any other medicines. This means medicines you have bought yourself as well as medicines on prescription from a doctor.
Possible side effects

Like all medicines, this medicine can cause side effects, although not everybody gets them. If they occur, they are likely to be temporary, and not serious. However, some may be serious and need medical attention.

STOP taking Flucloxacillin Capsules and contact your doctor immediately if you experience:

• allergy or hypersensitivity including itching, rash, sore mouth or eyes, swelling of the face, lips, throat or tongue or breathing problems
• severe, possibly deadly, diarrhoea or diarrhoea which does not settle even if you drink plenty of fluids, stomach upset or feeling sick - (may affect up to 1 in 10,000 people):
  • severe rash with reddening, peeling and swelling of the skin that looks like a burn (toxic epidermal necrolysis)

Tell your doctor if you notice any of the following effects:

Common (may affect up to 1 in 10 people):
• diarrhoea, stomach upset and feeling sick - should be mild and wear off after a few days.

Very rare (may affect up to 1 in 10,000 people):
• difficulty passing water or blood in the urine (may be a sign of inflammation of the kidney)
• unusual bleeding or bruising, anaemia (may be caused by changes in the numbers of blood cells)
• joint or muscle pains or fever (may develop 2 days after starting treatment)

Check with your doctor if you have any problems while taking this medicine, even if you think the problems are not connected with the medicine, or are not listed in this leaflet.

Reporting of side effects

If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects, although not everybody gets them. If they occur, they are likely to be temporary, and not serious. However, some may be serious and need medical attention.

For the most common side effects, see section 4.

For unusual side effects, see section 2.

For information on the safety of this medicine, see your doctor.

How to store your medicine

KEEP THIS MEDICINE OUT OF THE SIGHT AND REACH OF CHILDREN

Do not use this medicine after the expiry date which is stated on the label after EXP. The expiry date refers to the last day of that month.

Securitainers: Store below 25°C. Store in the original package. Keep the container tightly closed in order to protect from light and moisture.

Blisters packs: Store below 25°C. Do not open the foil pouch until ready to use the product. Once opened the foil pouch may be discarded. Store the product in the outer carton in order to protect from light and moisture.

Return any left-over medicine to the pharmacist. Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help protect the environment.

Contents of the pack and other information

What Flucloxacillin Capsules contain

The active substance is flucloxacillin as flucloxacillin sodium. The other ingredients are sodium starch glycolate, magnesium stearate, red iron oxide (E172), black iron oxide (E171) and gelatin.

Please see further information on sodium in section 2.

What Flucloxacillin Capsules look like and contents of the pack

The 250mg capsules are opaque caramel and grey, printed with FNX 250 in black ink. The capsules contain a granular off-white powder. The 500mg capsules are opaque caramel and grey, printed with FNX 500 in black ink. The capsules contain a granular off-white powder.

Both strengths are available in the following pack sizes:

• Secureitainers are available in pack sizes of 15, 18, 20, 21, 28, 30, 50, 100, 250 & 500 capsules.

Blister packs are available in pack sizes of 15, 18, 20, 21, 28, 30, 50, 100, 250, 500 & 600 capsules. Not all pack sizes may be marketed.
